FOREWORD

The Ministry of Health recognizes the indispensable role of robust management information systems in effective planning, monitoring, and governance. We acknowledge the significance of timely and accurate health data in advancing our health systems, expanding services, and tracking progress in the sector.

With dedicated efforts, we have made considerable investments in improving our Health Management Information System (HMIS). We are proud to present the collated data through annual publications, notably the Annual Health Bulletin (AHB). This publication not only showcases key health indicators, including health-related Sustainable Development Goal (SDG) and national plan indicators, but also reflects our commitment to quality by implementing stringent data checks and validation processes.

In our continuous pursuit of data quality and reliability, we are now seeking to integrate the regular validation of data for diseases and services by concerned program officials into the AHB publication process. This step aims to further enhance the accuracy and credibility of the information presented. Additionally, we have initiated efforts to transform our HMIS into a paperless system through the implementation of the District Health Information System 2 (DHIS2). To ensure comprehensive and timely reporting from health facilities, we are prioritizing capacity building and equipping them with ICT tools, including tablets. However, we acknowledge the challenge posed by limited access to internet and telecommunication services in remote communities, hindering the complete realization of a paperless HMIS.

We remain fully committed to strengthening our information system as a vital resource for evidence-based health decisions and policy formulation. In line with this commitment, we are actively working towards the development of an electronic Patient Information System (ePIS) under the Digital Drukyul Flagship Program. This initiative aims to improve the coverage, quality, and equity of healthcare services while enabling the usage and sharing of timely and accurate health information.

We sincerely hope that the rich data and information presented in the AHB 2023 will be effectively utilized by government agencies, civil society organizations, healthcare professionals, academics, development partners, media, and other stakeholders. We also welcome your feedback on further improving our system and publications as we strive for continuous enhancement.

(Dasho Decken Wangmo)
Health Minister

Acknowledgement

The HMIS and Research Section (HRS), serving as the secretariat for the Annual Health Bulletin series under the Policy and Planning Division of the Ministry of Health, would like to express our heartfelt gratitude to each of you for your valuable contributions to the successful compilation of the AHB 2023.

Firstly, we extend our sincere appreciation to all health services providers and Dzongkhag Health Offices across the nation. Your dedicated efforts in compiling and submitting health data through the DHIS2 system have been crucial in ensuring the availability of accurate and comprehensive information.

Furthermore, we would like to express our gratitude to the following Programs and Divisions for sharing their program and administrative data, which significantly enriched the content of the AHB 2023:

1. Human Resource Division, Ministry of Health (List of human resources for health)
2. Surveillance & Epidemiology Unit, Royal Centre for Disease Control, Ministry of Health (Notifiable diseases data)
3. District Health Services Programme, Ministry of Health (List of health facilities)
4. National HIV/AIDS Control Program, Ministry of Health (HIV/AIDS data)
5. National TB Control Program, Ministry of Health (TB data)
6. Vector-Borne Disease Control Program, Ministry of Health (Malaria and dengue data)

We would like to extend a special appreciation to Mr. Chana Singye, an IT Professional from the Health Promotion Division under the Ministry of Health. His invaluable contribution in designing this book, demonstrating creativity, attention to detail, and technical expertise, was indispensable in shaping the final product.

Once again, we thank each and every one of you for your unwavering support and collaboration. It is through your collective efforts that we have been able to produce the AHB 2023, a valuable resource for health professionals, researchers, policymakers, and other stakeholders. Members of Annual Health Bulletin 2022 Secretariat:

State of Nations health

The total number of caseload (total hospital visitors) in the health facilities has increased by 2.1 percent in 2022 as compared to 2021 indicating an increase in health service utilization. However, the number of caseloads remains 20 percent lower than the total number of patients seen in 2018.

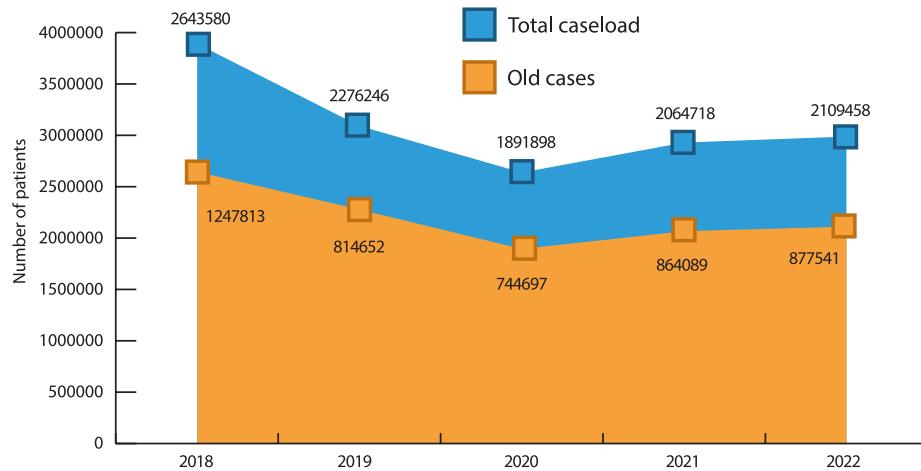

Figure 1: Trend in total caseload over the past 5 years

The most common causes of morbidity have not changed significantly over the past years. The common morbidity recorded in the health facilities around the country are common cold, skin infections, peptic ulcer symptoms and dental caries. The ten most common diseases account for 60 percent of the total morbidity cases (new cases) reported by the health facilities.

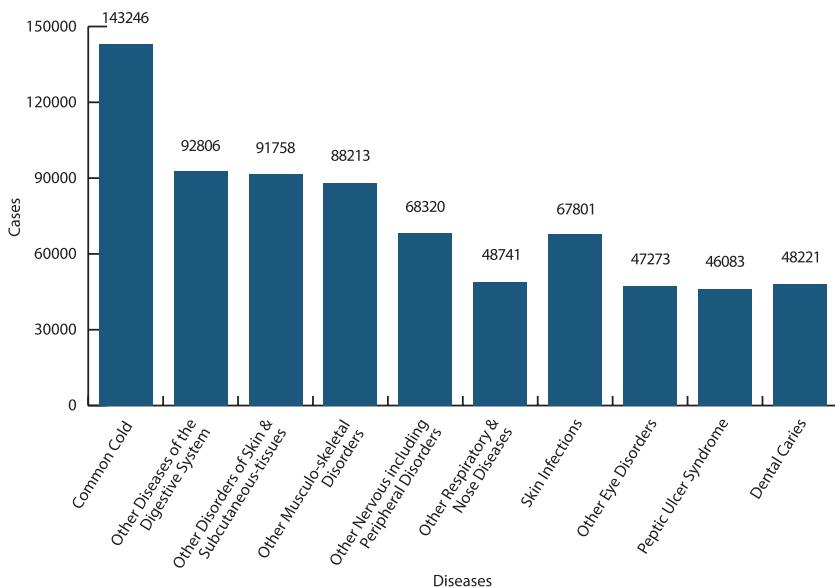

Figure 2: Top ten cases of morbidity seen at health facilities in 2022

Inpatient cases are reported only by the hospital. A total of 82839 IPD cases were reported in 2022, of which 87.12% of the IPD cases were new cases while 10675 were old cases (repeat admission due to same illness).

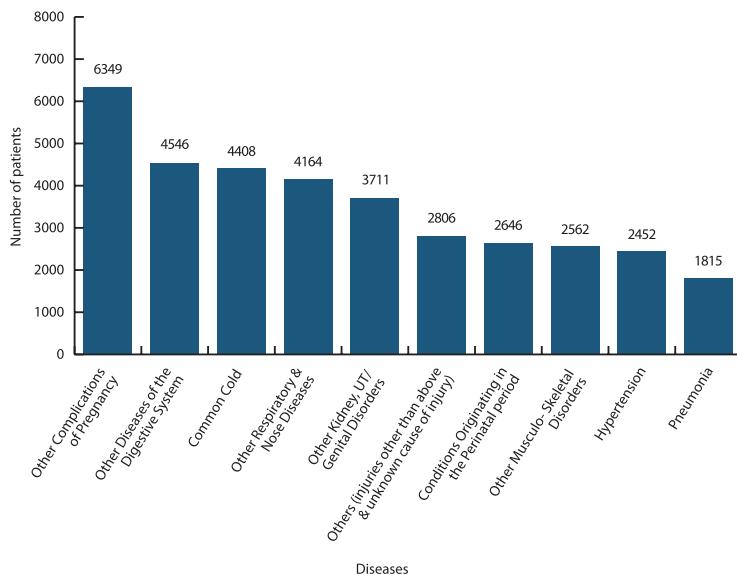

Figure 3: Total IPD cases by type

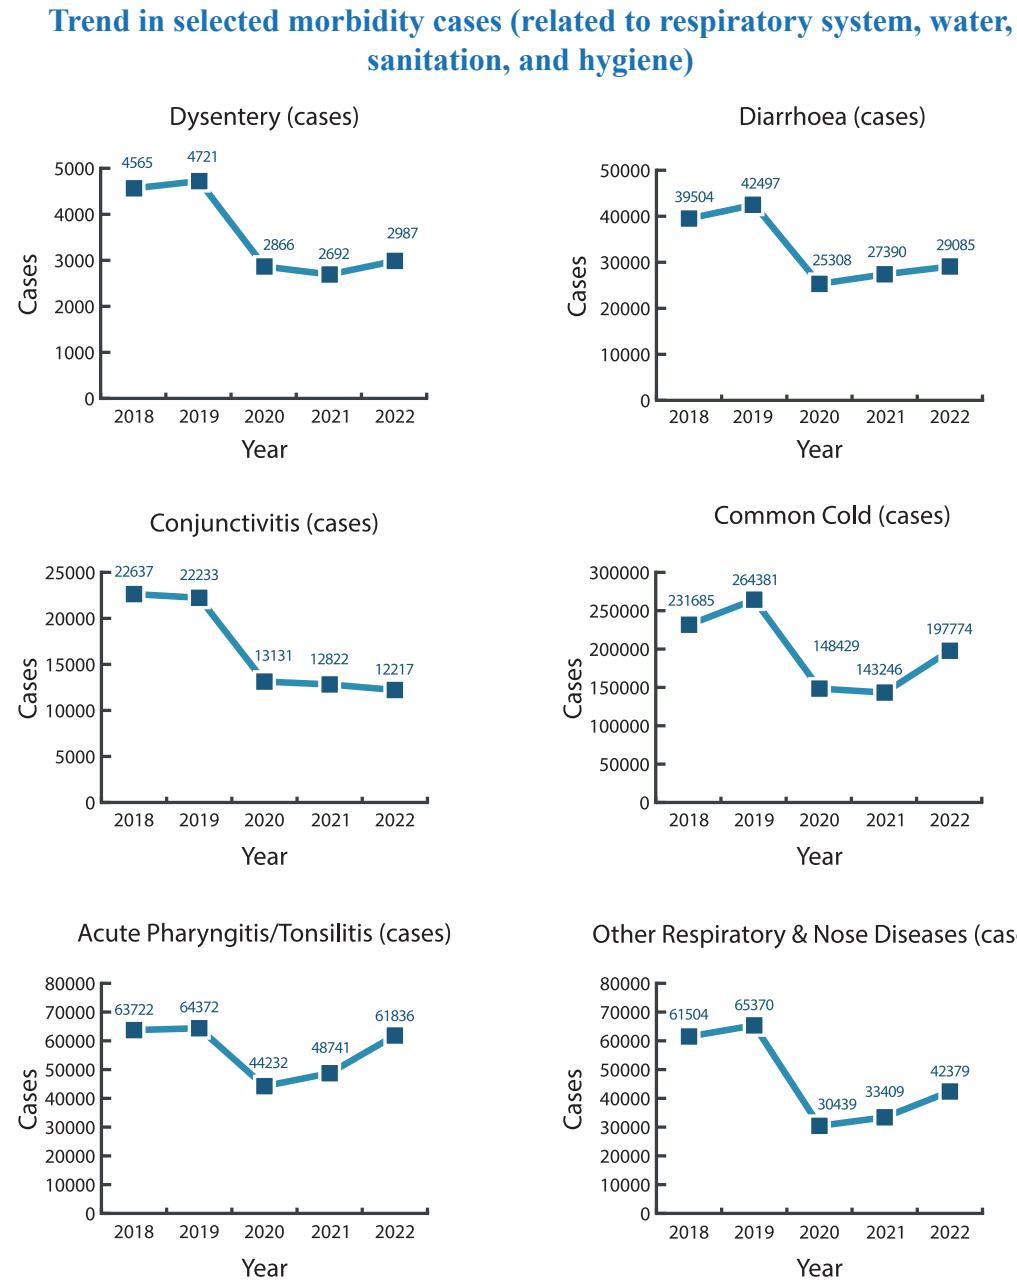

Figure 4: Trend in selected morbidity cases (related to respiratory system, water, sanitation, and hygiene)

There is a significant reduction in the incidence of diseases such as common cold (14.6%), Diarrhea (26%), Conjunctivitis (46%), Disorders of Skin & Subcutaneous tissues (15.2%), Acute Pharyngitis/Tonsilitis (31%), and Skin Infections (33%). This highlights the success of enhanced preventive measures such as use of face masks, physical distancing, and hand washing during the covid-19 outbreaks. However, the incidence of these diseases is on the rise as compared to 2021. The other diseases related to respiratory, and WASH is also on rise as compared to 2021. The rise in the number of cases could be attributed to many factors such as change in behavior, reduced compliance to the preventive measures after relaxation of Covid-19 protocols, increase in number of people seeking health care services and accessibility to services. Appropriate measures to sustain the positive impact of these preventive measures are deemed necessary.

Trend in selected morbidity cases (non-communicable diseases)

While the cases of selected non-communicable diseases in 2022 have remained below the number of cases seen in 2018, the cases are on rise as compared to 2021. The number of diabetes has increased by 3230 as compared to 9143 in 2021. The number of diabetes cases has increased drastically as compared to 5716 cases in 2018 (increased to 12373 cases in 2022). Further hypertension cases have also increased by 12% compared to 2021. The total cases of alcohol liver disease and rheumatic heart disease have declined by 0.26% and 16% respectively in 2022 as compared to 2021.

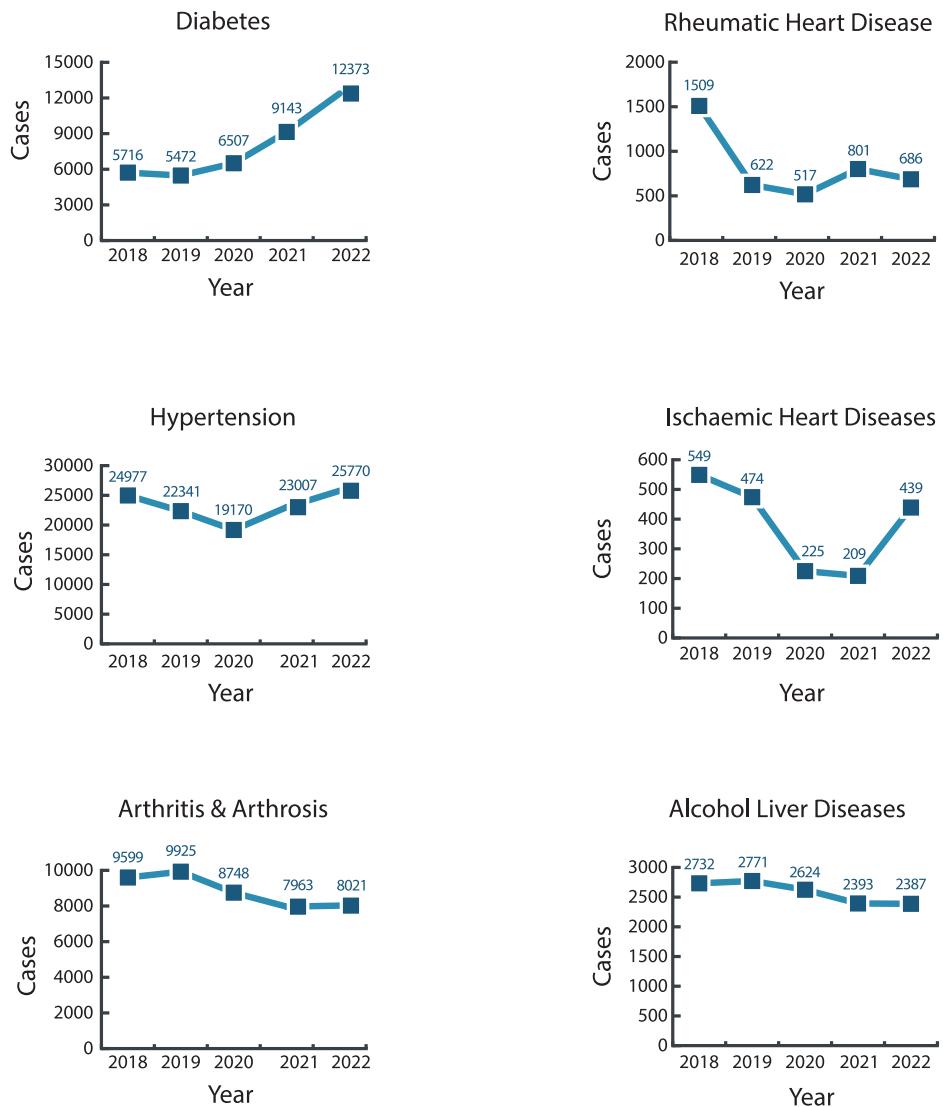

Figure 5: Trend in total cases of NCDs over the years

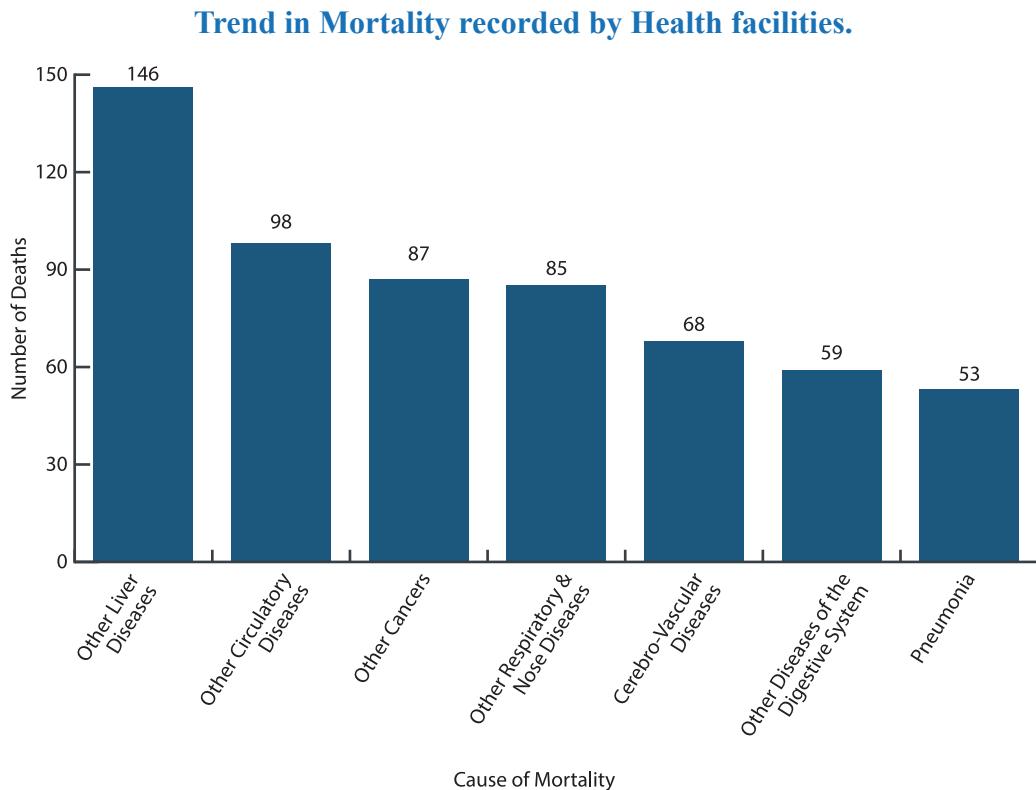

Figure 6: Top causes of mortality

Health facilities around the country record and report the deaths occurring in health facilities. However, due to various reasons, many of the deaths occurs outside health facilities and therefore remains unrecorded. In 2022, only 1194 deaths were reported by the health facilities. This is 6percent higher than the number of deaths recorded in 2021. The PHCB recorded 4894 deaths (in the past year). Therefore, the total number of deaths recorded in health facility was approximately 24percent of the total deaths occurring in the country. Alcohol liver disease remain the leading cause of deaths reported by health facilities, accounting for 12.22% of the deaths. The total neonatal deaths in the country reduced by more than 50% in 2022 as compared to 2021.

Malaria

The Vector-borne Disease Control Program (VDCP) has been gearing towards malaria free Bhutan by 2025. The VDCP through its concerted efforts has reduced the cases of malaria from approximately 39000 cases in 1990's to less than 5 cases in 2022. However, sporadic upsurge in the number of cases continues to be detected due to various factors. The malaria elimination target was hampered due to high number of indigenous cases in 2020 (22 cases).

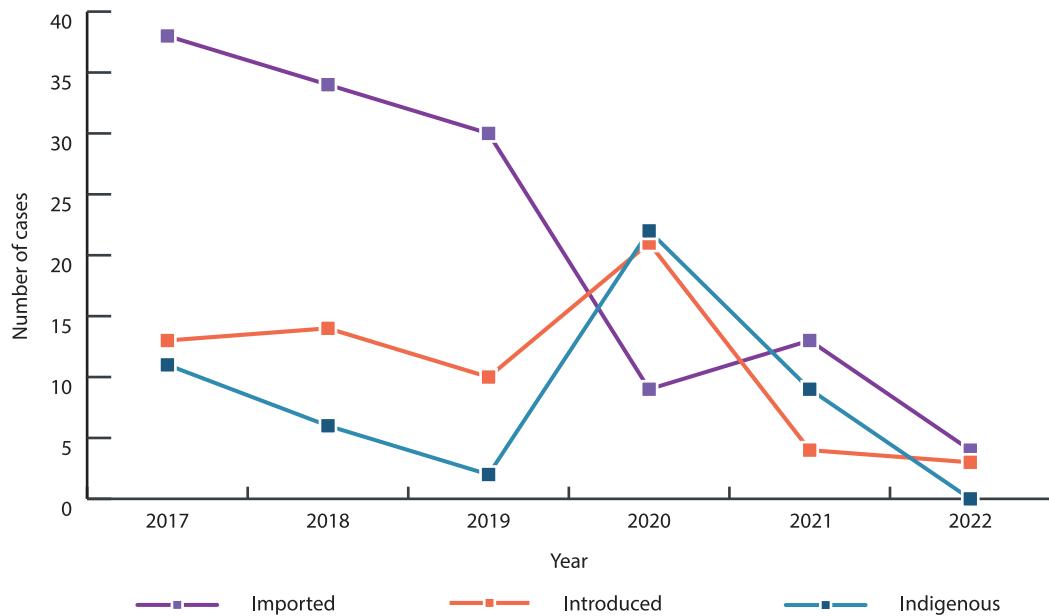

Figure 7: Trend in malaria cases since 2017 by type of cases.

SECTION 1: HEALTH INDICATORS

Table 1.1: Sustainable Development Goals and the corresponding national health indicators in Bhutan as of 2022

SDG Goals	SDG Targets	SDG Indicators	National Equivalent SDG	2022	Source
Goal 3. Ensure healthy lives and promote well-being for all at all ages	3.1 By 2030, reduce the global maternal mortality ratio to less than 70 per 100,000 live births	3.1.1 Maternal mortality ratio (Per 100,000)	3.1.1 Maternal Mortality Ratio (Per 100,000)	89	PHCB 2017
			Number of maternal death	7	MPNDSR 2022
		3.1.2 Deliveries attended by skilled health worker (%)	3.1.2 Deliveries attended by skilled health worker (%)	98.4	HMIS 2022
			Institutional delivery (%)	97.5	HMIS 2022
	3.2 By 2030, end preventable deaths of newborns and children under 5 years of age, with all countries aiming to reduce neonatal mortality to at least as low as 12 per 1,000 live births and under-5 mortality to at least as low as 25 per 1,000 live births	3.2.1 Under-5 mortality rate (Per 1000)	3.2.1 Under-5 mortality rate (Per 1000)	34.1	PHCB 2017
			3.2.2 Neonatal Mortality Rate (Per 1000)	21	NHS 2012

SDG Goals	SDG Targets	SDG Indicators	National Equivalent SDG	2022	Source
Goal 3. Ensure healthy lives and promote well-being for all at all ages	3.3 By 2030, end the epidemics of AIDS, tuberculosis, malaria and neglected tropical diseases and combat hepatitis, waterborne diseases and other communicable diseases	3.3.1 Number of new HIV infections per 1,000 uninfected population, by sex, age and key populations	Total new cases	79	NACP 2022
		3.3.2 Tuberculosis incidence per 100,000 population	Total new cases (male)	42	NACP 2022
		3.3.3 Malaria incidence per 1,000 population	Total new cases (female)	37	NACP 2022
		3.3.4 Hepatitis B incidence per 100,000 population	Total new cases of HIV among Young adults (15-24)	5	NACP 2022
			Total TB cases detected	809	NTBCP 2022
	3.4 By 2030, reduce by one third premature mortality from non-communicable diseases through prevention and treatment and promote mental health and well-being	3.4.1 Mortality rate attributed to cardiovascular disease, cancer, diabetes or chronic respiratory disease	Malaria incidence (indigenous) per 1,000 risk population	0	VDCP 2022
		3.4.2 Suicide mortality rate	Total morbidity cases with Acute Hepatitis B	9.6	HMIS 2022
			Total mortality due to Rheumatic heart disease and ischamatic heart disease	26	HMIS 2022
			Total mortality due to Cancer	147	HMIS 2022
			Mortality due to diabetes	21	HMIS 2022
			Mortality due to respiratory disease	153	HMIS 2022
	3.5 Strengthen the prevention and treatment of substance abuse, including narcotic drug abuse and harmful use of alcohol		Suicide mortality rate per 100,000 population	10.4	NSR 2022
			Percentage of population aged 15-75 years who ever used drugs/ substance to get high	2.1	BMIS 2010

SDG Goals	SDG Targets	SDG Indicators	National Equivalent SDG	2022	Source
Goal 3. Ensure healthy lives and promote well-being for all at all ages	3.6 By 2030, halve the number of global deaths and injuries from road traffic accidents	3.6.1 Death rate due to road traffic injuries (per 100,000 population)	Death rate due to road traffic injuries (per 10,000 vehicles)	6.8	RSTA Annual Report 2021-2022
	3.7 By 2030, ensure universal access to sexual and reproductive health-care services, including for family planning, information and education, and the integration of reproductive health into national strategies and programmes	3.7.1 Proportion of women of reproductive age (aged 15–49 years) who have their need for family planning satisfied with modern methods	Contraceptive prevalence rate (aged 15–49)	65.6	BMIS 2010
			Unmet need for family planning	11.7	BMIS 2010
		3.7.2 Adolescent birth rate (aged 15–19 years) per 1,000 women in that age group	Percentage of women aged 15–49 years who knew at least one contraceptive method that could prevent or delay pregnancy	96.3	NHS 2012
	3.8 Achieve universal health coverage, including financial risk protection, access to quality essential health-care services and access to safe, effective, quality and affordable essential medicines and vaccines for all	3.8.1 Coverage of essential health services (defined as the average coverage of essential services based on tracer interventions that include reproductive, maternal, newborn and child health, infectious diseases, non-communicable diseases and service capacity and access, among the general and the most disadvantaged population)	3.7.2 Adolescent birth rate (aged 15–19 years) per 1,000 women in that age group	14.2	PHCB 2017
			Percentage of population within 2 hours to the nearest health facility	87.7	NHS 2012

SDG Goals	SDG Targets	SDG Indicators	National Equivalent SDG	2022	Source
Goal 3. Ensure healthy lives and promote well-being for all at all ages	"3.9 By 2030, substantially reduce the number of deaths and illnesses from hazardous chemicals and air, water and soil pollution and contamination"	3.9.3 Mortality rate attributed to unintentional poisoning	Number of death due to unintentional poisoning	1	HMIS 2022
	3.a Strengthen the implementation of the World Health Organization Framework Convention on Tobacco Control in all countries, as appropriate	3.a.1 Age standardized prevalence of current tobacco use among persons aged 15 years and older	The prevalence of current use of any tobacco product among 15-69 years population	23.9	STEPS 2019
			Population aged 15-69 years who are current smoker [percent]	10.6	STEPS 2019

SDG Goals	SDG Targets	SDG Indicators	National Equivalent SDG	2022	Source
Goal 3. Ensure healthy lives and promote well-being for all at all ages	3.b Support the research and development of vaccines and medicines for the communicable and non-communicable diseases that primarily affect developing countries, provide access to affordable essential medicines and vaccines, in accordance with the Doha Declaration on the TRIPS Agreement and Public Health, which affirms the right of developing countries to use to the full the provisions in the Agreement on Trade Related Aspects of Intellectual Property Rights regarding flexibilities to protect public health, and, in particular, provide access to medicines for all	3.b.1 Proportion of the target population covered by all vaccines included in their national programme	Crude childhood immunization coverage	96.69	VPDP 2022
			Proportion of 1 year-old children immunized against measles (MR1)	97.06	VPDP 2022
			BCG	99.1	VPDP 2022
			Penta/DTP-HipB1	98.2	VPDP 2022
			Penta/DTP-HipB2	99	VPDP 2022
			Penta/DTP-HipB3	97.9	VPDP 2022
			OPV0	90	VPDP 2022
			OPV1	100	VPDP 2022
			OPV2	100	VPDP 2022
			OPV3	100	VPDP 2022
			Crude HPV vaccination coverage	90	VPDP 2022
			Crude maternal TT2 coverage	100	VPDP 2022
		3.b.3 Proportion of health facilities that have a core set of relevant essential medicines available and affordable on a sustainable basis	Proportion of essential medicines available in all health facilities at any point of time	97	Program

SDG Goals	SDG Targets	SDG Indicators	National Equivalent SDG	2022	Source
Goal 3. Ensure healthy lives and promote well-being for all at all ages	3.c Substantially increase health financing and the recruitment, development, training and retention of the health workforce in developing countries, especially in least developed countries and small island developing States	3.c.1 Health worker density and distribution	Doctors density per 10,000 population	4.6	HRD
			Pharmacists density per 10,000 population	3.1	HRD
			Health Assistants density per 10,000 population	8.5	HRD
			Indigenous Physicians density per 10,000 population	1.0	HRD
			Sowa Menpa density per 10,000 population	2.3	HRD
			Distribution of health facilities per 10,000 population	3.8	DMS
			Ratio of beds per Nurse	1.08	HRD & DMS
			Ratio of Nurses per Doctor	4.33	HRD & DMS

SDG Goals	SDG Targets	SDG Indicators	National Equivalent SDG	2022	Source
Goal 6. Ensure availability and sustainable management of water and sanitation for all	6.1 By 2030, achieve universal and equitable access to safe and affordable drinking water for all	6.1.1 Proportion of population using safely managed drinking water services	Proportion of population using safely managed drinking water services (%)	70.3	STEPS 2019
	6.2 By 2030, achieve access to adequate and equitable sanitation and hygiene for all and end open defecation, paying special attention to the needs of women and girls and those in vulnerable situations	6.2.1 Proportion of population using safely managed sanitation services, including a hand washing facility with soap and water	Proportion of population using an improved sanitation facility (%)	94.6	STEPS 2019
			Proportion of population using safely managed sanitation services (%)	91.9	STEPS 2019
			Proportion of population having a handwashing facility on premises	99.5	STEPS 2019
			Proportion of population having a handwashing facility on premises with soap and water available (basic handwashing facility)	90.6	STEPS 2019
